Interlibrary Loans

The Atlanta Branch Library carries on an extensive interlibrary loan system whereby books are borrowed from other libraries to complement its resources. Other local libraries, the Department Library in Washington, large public libraries, university and research libraries, and the Library of Congress cooperate to supply unusual books for investigators engaged in serious research. Usually these libraries will not loan directly to individuals other than their own patrons, but will loan through other libraries. We shall be glad to borrow material for you.

FOOD SUPPLY__U.S.

NUTRITION AND FOOD SUPPLY: THE WAR AND AFTER. AMERICAN ACAD. POLIT. AND SOCIAL SCI. ANN. JAN. 1943, p.1-221.

Dr. John D. Black of Harvard University needs no introduction to U.S. Department of Agriculture personnel. His recent publications in the field of agricultural economics have been widely read. As editor of this issue of THE ANNALS he has not attempted to present a comprehensive treatment of this broad, rembling subject. He has, rather, chosen significant aspects in order to show the reader what the problems are and to stimulate an interest in following future developments. Samplings from the broad fields of nutrition technology, the general food situation, consumption and distribution, production and processing are presented through discussions by experts in the various fields. Many of the contributors are prominent members of the U.S. Department of Agriculture staff.

If you like to keep abreast with the literature being published in the field of social sciences, you will enjoy the signed reviews of recent books included in this and other issues of THE ANNALS.

LAND UTILIZATION

Conner, M.C., Hendrix, W.E., Sayre, C.R., & Fullilove, W.T. FARM ADJUSTMENT OPPORTUNITIES IN GREENE CO., GEORGIA. GA. EXP. STA. BUL. 221. 1942. 47p. Discusses farm adjustment opportunities in Greene Co. Ga. On an acre

basis, cotton is the most profitable crop in the area, but farming systems based mainly upon cotton make for poor utilization of the available land and human resources.

U.S. National resources planning board. Land committee. TAX DELINQUINCY AND RURAL LAND-USE ADJUSTMENT. U.S. Govt. print. off., 1942. 190p. (Tech. paper no. 8)

This report of the subcommittee on delinquency is concerned with the "fringes" or areas where differing natural land use areas merge. It shows that there is a decided correlation between tax delinquency and maladjustment of land use. A strong case is made for adequate tax enforcement pro-

cedures as an effective means of bringing maladjusted land into public ownership for replanning and better use.

LIBERTY OF THE PRESS

The Univ. of Chicago round table. ARE WE WELL INFORMED? 1943. 27p.

"A radio discussion by Ralph Gerard, William Ogburn, and Gerald Wendt."

U.S.—POLITICS AND GOVERNMENT

Howe, Quincey. TWELVE THINGS THE WAR WILL DO TO AMERICA. Clipping from

Harpers Magazine, Nov. 1942.

Mr. Howe, editor and news commentator, reviews the sweeping changes in our political and economic system which the war is bringing about and which he thinks will continue. He sees the United States rapidly becoming a strong nationalistic state with increased social security for the masses. Strong government control and planning, as opposed to free enterprise and individual liberty are, he believes, necessary to make mass production function to raise peacetime living standards.

University of Chicago round table. 1943—CHALLENGE TO THE REPUBLICAN PARTY.

Jan. 10, 1943. 29p. U.S. DEPT. OF AGR. FINANCE
